RE: Changes to Merit Rating Board Policy Inquiry Response Record

NOTICE NO: 0026

We are adding two (2) fields to the Policy Inquiry Response Record: an Operator Clean-In-Three Indicator and an Incident Code. These two (2) fields were requested by the Division of Insurance and representatives of the insurance industry to support the private passenger automobile insurance changes for 2008. We are adding the two (2) fields to the unused, or filler, area of the record so that insurers will not need to change their applications until they are ready to use these new fields.

We are also changing the criteria for returning values in fields 19-22, the CAR Rule 12 fields, to return values for all operators and for information only inquiries (Inquiry Transaction Type = "9"). Currently, values are returned in these fields only if the operator age is under 25 years and the Inquiry Transaction Type is not = "9".

I'm including a brief description of these two (2) new fields below. The revised Policy Inquiry Response File Specifications are in the enclosed Appendix B.

These changes are scheduled to be installed for insurer inquiries processed on February 4, 2008.

Operator Clean-In-Three Indicator, Field Number 23. This field identifies the Clean-in-Three Risk status of a listed operator as defined in MAIP Rule 22 Definitions for Clean-In-Three Risk. A value of "1" indicates that the operator is a Clean-In-Three Risk. A value of "0" indicates the operator is not a Clean-In-Three Risk. A value of space indicates the Clean-In-Three Risk status is unknown. Values will be reported in this field for policies with effective dates on or after 04-01-2008.

MRB does not currently collect Personal Injury Protection (PIP) claims and lapse in coverage information. We are evaluating approaches for building these records going forward. The draft 211 CMR 134 includes preliminary requirements for PIP claims. We will publish administrative procedures for reporting PIP claims after 211 CMR 134 has been approved.

Incident Code, Field Number 24. This field contains the violation code for a traffic law violation or the claim amount for an at-fault accident. The violation code for a traffic law violation is the 9-position code used by the RMV to identify a traffic law violation. The table of violation codes is included in the enclosed Appendix H. This table will need ongoing updates because the RMV frequently adds new violations.

The violation code for a Massachusetts traffic law violation may be viewed on the UMVI screen. The claim amount for the surchargeable at-fault insurance claim may be viewed on the UMO screen for an operator or on the UMA screen, which contains detail information for the at-fault insurance claim. These screens are described in Section 3 of the RMV's *UMS User Manual*.

Appendix B: Policy Inquiry Response File Specifications (continued)
Policy Inquiry Response Record Data Element Definitions

Field
Number

1   **Policy Inquiry Source Record.** This field contains the Policy Inquiry Source Record that was submitted by the insurer to the MRB.

For a non-error Policy Inquiry Response Record, RMV License Number, RMV License State Code, RMV Surname and RMV Birth Date identify the RMV License Record of the listed operator unless the specified driver license was not issued in Massachusetts and a matching RMV License Record does not exist.

2   **RMV License Number.** This RMV License Number contains the value in the Operator License Number field on the Policy Inquiry Source Record (Source Record) with the following exceptions:

•(a) Source Record License State Code = MA
This field contains the current Massachusetts driver license number associated with a previous license number that exactly matches the Source Record license number. For example, this field contains a system assigned number beginning with "S" that is the current license number when the Source Record license number is the social security number that is the previous license number.

•(b) Source Record License State Code not=MA; RMV License State Code=MA
This field contains the Massachusetts driver license number associated with a previous license number and non-Massachusetts license state code that exactly match the Source Record license number and license state code.

•(c) Source Record License State Code not = MA
This field contains an out-of-state license number with more characters than the number of characters in the Source Record license number when the Unlicensed Operator Record license state code = Source Record license state code and the Unlicensed Operator license number matches the Source Record license number on the first 9 characters. An Unlicensed Operator Record contains the actual non-Massachusetts license number and license state code.

3   **RMV License State Code.** This RMV License State Code contains the value in the Operator License State Code field on the Policy Inquiry Source Record except as explained in 2(b) above.

Appendix B: Policy Inquiry Response File Specifications (continued)
Policy Inquiry Response Record Data Element Definitions

Field
Number

4   **RMV Surname.** This RMV Surname contains the first 5 characters of the
Operator Surname field on the Policy Inquiry Source Record (Source Record)
with the following exceptions:

This field contains the current last name when the Source Record surname
matches the current last name on 3 of the first 5 characters or when the Source
Record last name matches a previous last name on 3 of the first 5 characters. This
partial match on last name occurs only when a license record license number
matches the Source Record license number and Source Record license state code
= MA, or when an Unlicensed Operator Record license number and license state
code match the Source Record license number and license state code.

5   **RMV Birth Date.** This RMV Birth Date contains the value of the Operator Birth
Date field on the Policy Inquiry Source Record (Source Record) with the
following exceptions:

This field contains the current birth date when Source Record birth date matches
the current birth date field on month and day, day and year, or month and year.
This partial match on birth date occurs only when a license record license number
matches the Source Record license number and the Source Record license state
code = MA, or when an Unlicensed Operator Record license number and license
state code match the Source Record license number and license state code.

6   **RMV License Return Code.** For a non-error Policy Inquiry Response
Record, this RMV License Return Code identifies the type of license in the RMV
License Number field. See "Appendix O: RMV License Return Code – Policy
Inquiry Response" on page O.1.

Appendix B: Policy Inquiry Response File Specifications (continued)
Policy Inquiry Response Record Data Element Definitions

Field
Number

7	**MRB Edition Number.** This field contains the Edition Number assigned by the MRB to the Policy Inquiry Source File for which this Policy Inquiry Response Record was created.
8	**MRB Process Date.** This field contains the computer system date on which this Policy Inquiry Response Record was created.
9	**MRB Error Code.** When Operator SDIP Points contains a value of "E0", from one to five two-position error codes in this field explain the reason the Policy Inquiry Source Record was rejected. Each MRB Error Code describes a data element in error. Each error code is described in "Appendix P: MRB Error Code – Policy Inquiry Response" on pages P.1 through P.3.
10	**Operator SDIP Points.** This field contains the total number of Surcharge Points from 00 through 45 or a value of "99" to indicate the Excellent Driver Discount Plus (6-year credit), or the value of "98" to indicate the Excellent Driver Discount (5-year credit). This field contains a value of "E0" to indicate the Policy Inquiry Source Record has one or more errors.
11	**Incident Type.** For an at-fault accident, this field contains a value of "4". For a traffic law violation, this field contains a value of "3". For an incident from an out-of-state driving record, this field contains a value of "3". If the operator has no surchargeable incidents or if the Policy Inquiry Source Record was rejected with errors, then this field = spaces.
12	**Incident Date.** For an at-fault accident, this field contains the Incident Date submitted by the insurer on the SDIP Claim Source Record. For a traffic law violation, this field contains the Date of Offense from the citation document. For an out-of-state incident, this field contains the Incident Date from the out-of-state driving record. If the operator has no surchargeable incidents or if the Policy Inquiry Source Record was rejected with errors, then this field = spaces.

Appendix B: Policy Inquiry Response File Specifications (continued)
Policy Inquiry Response Record Data Element Definitions

Field
Number

13   **Incident Surcharge Date.** For an at-fault accident, this field contains the
Notice Date submitted by the insurer on the SDIP Claim Source Record. For a
traffic law violation, this field contains the Disposition Date of the judgment
written by the Court Representative on the citation document, the date the civil
assessment was paid, the date of the court judgment at a civil hearing, or the
default date set by the RMV when neither payment nor hearing request was
received on time for a citation containing all civil infractions. For an out-of-state
incident, this field contains the Conviction Date from the out-of-state driving
record. If the operator has no surchargeable incidents or if the Policy Inquiry
Source Record was rejected with errors, then this field = spaces.

14   **Incident (SDIP Statement) Description.** This field contains a twenty-
character description of the surchargeable incident that is to be printed on the Safe
Driver Insurance Plan Statement Incident Line. This description of the
surchargeable incident must be displayed on the Safe Driver Insurance Plan
Statement. If the operator has no surchargeable incidents or if the Policy Inquiry
Source Record was rejected with errors, then this field = spaces.

15   **Incident Number of Points.** This field contains the number of Surcharge
Points for this incident. If the operator has no surchargeable incidents or if the
Policy Inquiry Source Record was rejected with errors, then this field = spaces.

16   **Operator Incident-Free Period.** This field contains the number of
consecutive Incident-Free Years immediately preceding the Policy Effective Date
and within the Policy Experience Period of the policy for which the operator had
a valid driver's license and had no surchargeable incidents.

17   **Operator Experience Date.** This field contains the beginning date of the
Policy Experience Period (six years) or a later date if the operator has fewer than
six years of driving experience.

Appendix B: Policy Inquiry Response File Specifications (continued)
Policy Inquiry Response Record Data Element Definitions

Field
Number

18   **Potential Extra Risk Indicator (DWI Alcohol Program).** This field is set
to "1" to indicate that the court reported a "Guilty" judgment on a violation of
RMV violation code 90 24D "DWI ALCOHOL PROGRAM" and is set to "0" for all
other incidents.

19   **Years Licensed.** This field contains the number of years licensed for this
driver up to a maximum of six (6) years. The number of years licensed is
determined from the RMV License Record or the number of years of driving
experience submitted by the insurer on the Policy Inquiry Source Record.

20   **RMV Date Licensed.** For a Massachusetts licensed driver, this field contains
the date first licensed from the RMV License Record.

21   **RMV Driver Training Status.** For a Massachusetts licensed driver, this field
contains the driver training status from the RMV License Record as follows: "Y"
= driver has passed a driver education course; "N" = driver has not passed a
driver education course; "U" = Unknown.

22   **RMV Sex.** For a Massachusetts licensed driver, this field contains the sex code
from the RMV License Record as follows: "M" = male; "F" = female;
"U" = Unknown.

23   **Operator Clean-in-Three Indicator.** This field contains the operator's Clean-
in-Three indicator as follows: "0" = operator is not Clean-in-Three; "1" =
operator is Clean-in-Three; space=Unknown.

24   **Incident Code.** If Field Number 11 Incident Type = "3" this field contains the
Violation Code. See Appendix H: Violation Code. If Field Number 11 = "4",
this field contains the loss amount of the highest-loss-amount (surchargeable)
claim for the at-fault accident. If the operator has no surchargeable incidents or if
the Policy Inquiry Source Record was rejected with errors, then this field =
spaces.

25   **Filler.** Reserved for future use.
